

Boston College Hosts to Tech Debating Team

Three Freshman And One Soph Hold Movies Are Not Demoralizing

Michigan Will Debate Tech While On Country-Wide Tour

"Dutch Treat" Debate At Tech; Radcliffe Will Argue For Proposal

The freshmen and one Sophomore will comprise the Technology debating team which will be the guests of a similarly composed group from Boston College this afternoon to discuss the subject of the effect of movies on the morals of American youth. Technology upholds the stand that the movies are not detrimental. The four who will contend this are Edouard R. Bossange, '38, Robert Treat, Jr., '38, Paul W. Vogel, '37, and Will Lyons, '38.

The future program of interscholastic debates for the society is quite extensive. Outstanding is the proposed visit by the Michigan University team which will meet Technology on its trans-continental tour. This team has a national reputation and its debate with Tech on March 27. It is tentatively planned by the society to have a banquet in the Grill Room at Walker Memorial when the visitors come in order to entertain them.

Will Debate with Radcliffe
The proposed debate with Radcliffe is now a certainty. It will take place (Continued on Page 6)

Faculty Produces "As Husbands Go"; Second Annual Play

Staff Members And Wives Act In Crothers Comedy; Light Farce

Members of the faculty and their wives will take a trip to Europe in imagination and then present the results of their trip as a play, "As Husbands Go", a light, amusing comedy by Rachel Crothers. The organization through which this is done is known as The Drama Club. It was organized two years ago for staff members, their wives, and wives of students who were interested in amateur theatricals. Last year the club produced "The First Mrs. Fraser" and it was an acclaimed success. As a result the club was enabled to donate a goodly portion of the proceeds to the fund of the Women's Committee of the Unemployed Engineers. It is planned to repeat this procedure this year.

The play this year will be presented on the evenings of March 8 and 9, Friday and Saturday respectively, at the Peabody Play House, 357 Charles (Continued on Page 6)

Drama Club

Survey Shows More T. C. A. Campers Than Non-Campers Enter Activities

Freshmen who attended freshman camp at Lake Massapoag last September entered extra-curricular activities in greater percentages than those who were not present at the camp, a recent survey by THE TECH indicates.

Fifteen major activities, including eleven sports, were included in the survey. Out of 403 men in these activities, 182 were at freshman camp and 221 were not. Since less men attended camp did not, the percentage figures are reversed, with 65.7% of the number not at camp in activities, and 91.0% of the number at camp in these same fifteen activities. There is a certain amount of duplication here,

MS223 Enrollment Is Plus Or Minus One

It happened in an MS223 class the other morning. Lieutenant Richer was reading a list of the men who had been late or absent at least three times this term. He proceeded down the list of eight or ten reporting three or four absences for each. With the last name he hesitated. "R. G. Vincens. Is Mr. Vincens here?"

No response.
"Well, he has been late once and absent five times." Then he paused. "I'm not sure whether Mr. Vincens is actually taking this course or is just sitting in once in a while."

Sports Medals To Be Awarded

Institute Championships Will Be Established In All Sports

Individual Institute Championships will be established in all sports which do not already give such recognition. In "team athletics" where this is not possible, the award will go to the player who—in the opinion of his fellow players—has proved the most valuable member, either in winning contests, or in fostering a sportsmanlike spirit in the sport, the Varsity Club announced yesterday.

These individual championships will be announced every year, with their selection under the supervision of the M. I. T. A. A., announced Joseph Levis, president of the Varsity Club. Medals will be given to the recipients of each of the championships.

Awards will be made in all sports except where a recognized Institute championship already exists. The managers are planning on beginning at once, so that candidates will be selected very shortly.

N. S. L. Joins Rivals; Plans United Action

Sentiment For War And Facism Opposed By Groups

Student chapters of the National Student League and the League for Industrial Democracy have formally "buried the hatchet" and have concluded an agreement for united action, it was announced after a meeting of the organizations Wednesday. The combined groups plan to combat sentiment in favor of War and Facism at Technology although each will be free to carry on its other activities.

Among the plans discussed for united action were the preparations for a mass meeting next week to protest the comments of the Hearst press, a 1935 All-Tech Anti-War Conference, and student strike against war on April 12.

Tech Show Starts Publicity Drive In Lobby Monday

Reserved Seats At One Dollar For Annual Musicomedy "Hit and Run"

Presentations March 27, 28, 30

An extensive publicity campaign, the object of which is to make the Institute Tech Show conscious, will be launched Monday when tickets for the musical comedy will be placed on sale in the main lobby. It is the desire of the management not only to sell tickets to students, but to faculty and alumni as well.

The show will be presented on the Wednesday, Thursday and Saturday nights of the Junior Prom week-end, in the Walker gymnasium, which will be altered to resemble a theatre. Seats, all of which will be reserved, will cost one dollar each. As a special attraction, there will be dancing in the main hall of Walker after the performances of March 27 and 28. As an indication of the necessity to buy tickets early the management cites the fact that one third of the available tickets are already reserved.

"Hit and Run" is the title of the presentation, written by two freshmen, Horace F. Homan, '38, and Arnold Potter, '38. It is a satire on Technology life and concerns itself with the activities of Professor Dinwiddie and his secretary, Gwen. These two parts are played by Charles L. Austin, '36, and Raymond Epstein, '38. Rehearsals have been in progress since before this term started, and an excellent performance is promised.

Sigma Xi Committee Will Donate Awards For Scientific Papers

All Senior Theses To Be Eligible For One Of Three Prizes Given Annually

One hundred dollars in prizes consisting of fifty, thirty and twenty dollar amounts will be awarded annually at the Commencement Exercises for the three theses submitted toward the degree of S. B. in the Institute during the preceding twelve months which in the opinion of the Sigma Xi Prize Committee embody the best research in pure or applied sciences.

The Society of the Sigma Xi has defined pure and applied science as follows: "Resolved, That the Sciences—Mathematics, Physics, Chemistry, Astronomy, Sciences of the Earth, Biology in its various branches including Psychology, Anthropology, Medicine in its various branches, and Engineering in its various branches—and others closely allied thereto represent, in general, the fields of investigation which it is the purpose of Sigma Xi to recognize."

The theses will be judged first and primarily on the research presented, and second upon the manner of presentation. Both individual and joint theses are eligible for these prizes.

To be considered for the Sigma Xi Prizes, a copy of each thesis and a signed statement that the thesis is submitted for these prizes must be turned in to a designated member of Sigma Xi in the department in which the thesis work was done on or before the last day set by the Faculty for the receipt of theses at the end of the second term.

Elect Committee

The members of Sigma Xi on the staff in each department in which research in pure or applied science is carried on shall elect each year a committee, a committee chairman, and a representative to receive the theses submitted. Each department committee shall review all the theses submitted to that department for the (Continued on Page 6)

Ballard, Loomis Head Senior Week

Committee Chooses Officers; King, Winiarski Also Elected

John B. Ballard, '35, was elected chairman of the Senior Week Committee at a meeting yesterday afternoon in the Faculty Room at Walker Memorial. At the same time Wesley H. Loomis, III, '35, was elected Secretary and Henry F. King, '35, and Kasmierz J. Winiarski, '35, were chosen members-at-large of the executive committee.

The function of the executive committee is general supervision of the activities of Senior Week. It appoints all sub-committees, approves their budgets, and decides upon methods of selling tickets for the events.

Included among the list of events of the Senior Week celebration are: banquet, pops concert, baccalaureate ceremony, class dance, tea dance, and the senior prom.

Plans of Open House Now Being Prepared

Men For Committees Chosen From Senior Class

Committees for Open House Day have been selected and are now making preparations for their work. Although the Combined Professional Societies take care of everything that occurs within the school the chairmen of the various committees do any outside work which will materially aid the general program for Open House. The committee chairmen are:

Program, T. C. Dauphine, '35; Signs, F. F. Tone, '35; Rooms, W. H. Matchett, '35; Reception, J. B. Chapman, '35; Posters, E. C. Edgar, '35; Invitations, S. S. Fox, '35; Guides, H. F. King, '35; Publicity, R. J. Granberg, '35; Contact Man, C. P. Grant, '35.

Four Get Correct Puzzle Solution As Amusing Errors Are Reported

After nights of exertion of wits and wracking of brains, five solutions in The Tech Crossword Puzzle contest were submitted, four of them being entirely correct.

The contest winners are Wallace K. Woods, G., Bernard Ross, '37, Robert J. Mocart, '37, and Leo Goldschlag, '35 and Rufus Isaacs, '36, the latter two working together. However, most of the amusement of the judges came from the incorrect solutions and attempts at solution.

Gets Two Words—But What Words
For instance, the story is told of one person attending the I. F. C. dance, who was rather amazed when the girl he was escorting could figure

Six Teams Meet Today for N.E.I.C. Wrestling Crown

Springfield Defends Title Here Against Tech, Yale, Brown, Harvard, Tufts

Marderosian and Oshry Among Tourney Favorites

Cream Of Eastern College Wrestlers See Action Friday, Saturday

Technology will be host to five New England College wrestling teams this Friday and Saturday when, Harvard, Brown, Springfield, Yale and Tufts send their respective contingents of varsity and freshmen wrestlers to participate in the New England Intercollegiate Wrestling Tourney in the Walker Memorial Gym. Considerable interest has been shown in intercollegiate wrestling during the past season, and arrangements have been made to handle a large turnout of fans. The schedule for the bouts follows:

Preliminaries: Friday, March 8th, 2:00 P. M.
Semi-Finals: Friday, March 8th, 7:00 P. M.
Finals: Saturday, March 9th, 7:00 P. M.

Springfield College, who was last year's winner in the Intercollegiate, will this year be able to place only two of her veterans back on the mats, Vic Kodis in the 165 lb. event and Cliff Clark in 145 lb. class. Powers and L'Hommedieu who saw action in the (Continued on Page 4)

Dramashop Will Give 'Beyond The Horizon' On March 21, 22, 23

Rehearsals Now Under Way On Pulitzer Prize Winner By Eugene O'Neill

Three, instead of two performances of Eugene O'Neill's "Beyond the Horizon" will be given by the Dramashop in the Commons Room of Rogers Building on the evenings of March 21, 22, and 23 at 8:15 P. M. Rehearsals have been under way for the last three weeks under the supervision of Professor Fuller acting as director and coach.

This play was awarded the Pulitzer Prize in 1920. It is a tragedy of New England concerning two brothers, Robert Mayo and his brother, Robert. Robert is a dreamer who longs to go "Beyond the Horizon", but who is instead doomed to remain among the hills where he was born and brought up. His ambitions are achieved by his brother while he achieves his brother's ambitions.

The cast includes James J. Souder, '36, who plays the part of Robert (Continued on Page 3)

EXPERIMENT IN EDUCATION

THE ROYAL ROAD-BED

IF an innovator suggests a new method of building houses, constructing bridges, or synthesizing a new industrial product, no one becomes particularly wrought up about it. But let someone devise a new theory in education, government, or morals, and the button is pressed which releases a bombardment of criticism from those who have something to lose by the establishment of a new system or from those who are hesitant about experimenting with human beings.

The innovator in the field of the social sciences has met with perhaps more obstacles than experimenters in the physical sciences. Experimentation in education compared with that in other fields has been pitifully small but not without sufficient reason. In the physical sciences when we wish to conduct research, we gather what material is necessary and proceed to twist it, take it in part, or sometimes entirely discard it.

In the human sciences the opposite is true. If research in this field is to be carried on at all it must be completely justified, and care must be taken to insure the essential "intactness" of that part to be treated. Thus it is that in trying to discover how society may be organized to fulfill more adequately the needs and desires of the people, the innovator has met with mass inertia, if not mass antagonism.

Many of the faults of our educational systems have long been recognized. While we regard the changes which have been made in education during the last century as manifestations of progress, they do not blind us to the many errors and inefficiencies of the system.

Perhaps the major difficulty facing a demand for revision is in the form of two questions: "What will be used to replace the old system?" and "Is there any assurance that a new system would be infallible or even an improvement?" One of the main features of the educational system, the final examination, torn to shreds by critics, continues to be the most widely used merely because no adequate substitute has yet been devised.

Harvard University, the University of Chicago, New York University, and many others have experimented and are now experimenting with theories which have but this in common: that they are all applied with much caution and trepidation. Educational research workers must keep in mind that the students with whom they work cannot be discarded when the experiment is concluded. The results need not be great, but must be positive.

Some day the royal road to education may be discovered, and the innovators will lay the road-bed. But the chances are that like most royal roads, it will be paved by a group so large as to make the builders of the Cheops look like a family gathering.

We are not confronted with a great obstacle in educating the genius. His talents prosper for what they are. He would probably survive his youth relatively unharmed by a poor educational system. But if it is ever found possible to develop the little talent which those of us who are not geniuses possess, then civilization can climb to a higher plane.

DISILLUSIONING IDEALISM

TOWNSEND PLAN

AS absent Professor "Bill" Greene would say, the Townsend Plan, she is dead. That, unofficially, is the present status of the California physician's visionary scheme for re-

lieving the needs of helpless old age. The final test of the plan lay in its acceptance by congress; fortunately that body has made clear its attitude toward the Townsend plan by refusing to allow it to come on the floor for a vote.

The deals which led Dr. Townsend to conceive his remarkable plan for old age relief were, without a doubt, very high. The economic reasoning which he and his followers applied to the construction of the plan was, unfortunately, too poorly based to produce a usable result.

The administration's plan for old age relief on the other hand, provides the necessary pensions and is conservatively drawn up on a sound economic basis. Now that the disillusioned followers of Dr. Townsend can no longer help his cause let them turn to the support of a method devised by economic experts which is at least capable of supplying aid to the aged.

THREAT TO CITIES

INDUSTRY DEPARTS

MANY cities of all sizes are beginning to realize now that in their interest definite steps must be taken to check the movement of industries from their present expensive city plants to less expensive locations in the country. The depression has forced many factory owners to study every possible method of cutting costs. Two important items in the operating expenses of a factory are power costs and taxes. As long as they saw no alternative, factory owners paid their share of the ever increasing tax burden.

During the past few years owners have been studying the possibility of moving their plants to the country to take advantage of cheap sites and low taxes. Low cost power developments have accelerated the movement to the country until at present the factory towns are frantically resisting a movement which has already developed an alarming momentum. Just as the workers fought a losing battle against the machine in the industrial revolution, it may now be the plight of the city to see its most valuable elements caught up in a relentless movement of industry to the cheap sites in all sections of the country.

In New England, textile factories have left their former locations in towns to find new sites in the less developed sections of the region. Some companies have moved their factories to cheaper sites in the southern states. Many towns have taken steps to prevent the departure of industries by legislative action.

Every student of engineering and industry should realize the seriousness of the situation from the point of view of the city and should also study the reasons for industry's countryward movement. If the government continues in its program of cheap power development, a rapidly increasing decentralization of industry can be expected. As long as there are real economies to be effected by moving factories from the city to the country, any efforts of the towns to prevent such movement will be futile. It may be that the city will in this case pay the price of progress. Whatever the outcome of the departure of industry from city to country, it is most important that the engineering and business student understand the reasons, and realize that the issue may become one of major importance to the nation.

With The American
College Editor

Our National Character

Possibly the greatest criticism one can make of the American people is that they place as the primary aim in life the acquiring of material goods, the hoarding and accumulation of money. During the depression years we told ourselves that we were learning a great lesson about life, that there were more important values than material, and that in the future our emphasis would be placed on more fundamental principles. But even now as we are beginning to emerge from the financial depression we let ourselves drop back into the same old line of thought.

In giving relief we thought we had done enough when we handed out some of the bare necessities of life to the poor. They were given a little money and clothing, but no thought was given to rehabilitating them morally and socially. Now with the government handing out millions to states and cities we find these forms of government thinking of nothing but how they may receive the largest amount for themselves. Little cognizance is taken of the more important responsibilities that a state should assume.

In our universities and colleges the same spirit seems to exist. Each college thinks first not of training in character and mind, but in gathering in the largest amount of material possessions. Larger buildings, big enrollments and rich endowments or appropriations are considered all that matters. Even in the classroom we find instructors valuing a position on the amount of cold cash one can get out of it. Students are taught to enter a certain field of work "because the pay is good."

Many people have been shocked recently at the bold admittance on the part of the governor of Alabama that he is primarily interested in pulling out the big-

American College Editor—Continued

gest possible plum from the national treasury. Money is not an end in itself, but only a means to an end, and the use and value placed on it is an indication of the kind of character we have. And our national character is exceedingly low, judged by such a standard.

This attitude on the part of individuals and of public officials is to be greatly deplored. We need wise leadership in these times, and one place where such leadership would prove greatly effective is in our colleges.

—Crimson-White
University of Alabama

Reviews and Previews

Now showing at the movies:

Paramount and Fenway—"While the Patient Slept", "Under Pressure".

Loew's State—"Folies Bergere", "Death Flies East".

Loew's Orpheum—"After Office Hours".

Metropolitan—"Ruggles of Red Gap", "La Continental Revue".

Modern—"Devil Dogs of the Air".

Fine Arts—"The Wandering Jew".

Majestic—"Lily of Killarney".

At the Shows:

Plymouth—"Hollywood Holiday".

Maurice Chevalier at State

"Folies Bergere" is a lavish picturization of the French musical comedy institution. Being so, it is replete with singing, dancing, and music. Five songs, two of which at least, you'll surely be humming soon, come from the production: "Rhythm of the Rain," "Singing a Happy Song", "Au Revoir L'Amour", "I Was Lucky", and "Folies Bergere". Chevalier does a lively impersonation of an amorous, bemousted, bemonocled French baron. Merle Oberon and Ann Sothorn, are prominent in the cast.

"Death Flies East", the companion film, deals with a murder mystery aboard a transcontinental air-liner. Conrad Nagel and Florence Rice are starred.

Charles Laughton, Margo, at Met

If you're looking for a good string of laughs, "Ruggles of Red Gap", with four of screenland's funniest: Charles Laughton, Mary Boland, Charlie Ruggles, and Zasu Pitts, can give them to you. Adapted from Harry Leon Wilson's famous book, the story concerns the adventures of a perfect English butler who is brought to this country by American tourists who win him in a poker game. The butler blossoms forth as a ladies' man to the grand amazement of the citizens in the rural American town of Red Gap.

On the stage is Margo, dancing star of "Crime Without Passion" and "Rhumba" "The Continental Revue."

Majestic Shows Irish Film

"Lily of Killarney", an Irish romance story filmed among the lakes of Killarney opened at the Majestic yesterday. It contains many picturesque scenes of the Emerald Isle, and a number of Irish Folk Songs, with an all-star Irish cast.

Mystery-Comedy at Paramount

Arline MacMahon and Guy Kibbee are gain together as principals in "While the Patient Slept", a mystery-comedy drama which opened yesterday at both the Paramount and Fenway theatres. On the same program is "Under Pressure", co-starring Victor McLaglen and Edmund Lowe, a melodrama of the building of a tunnel far under the East River.

Cagney, O'Brien, at Modern

"Devil Dogs of the Air" gives you a pretty good if somewhat exaggerated idea of life in the Marine flying training schools. James Cagney is the "wise acre" young student, already an experienced pilot, but who joins the Marines for the fun of it, to the constant embarrassment of Pat O'Brien, who knew him when they were kids. Trouble starts when the smart aleck acquires the affections of Margaret Lindsay, Pat's girl friend. The most amusing part of the picture is the "squeaky" laugh of Cagney's.

Orpheum Has Gable and Bennett

"After Office Hours" gives you Clark Gable as the managing editor of a newspaper attempting to solve a hushed society murder by means of his socialite reporter, Constance Bennett. Six more acts of Loew's vaudeville are on the accompanying bill.

"Wandering Jew" Continues

"The Wandering Jew" stays for a second week at the Fine Arts.

THE TECH

Inquires

This column endeavors to solicit student opinion upon selected questions. A reporter interviews students at random, in making his rounds about the Institute. Questions for this column may be submitted by readers. Open Forum comment on any of the answers will be welcomed.

Question for today: "Professor Penfield Roberts recently stated that he does not believe in free public schools and libraries, because a great many people are not educable. What is your opinion of this stand?"

C. Olson Pike, '37, X, 36 Kent Street, Newburyport:

"Granted there are uneducables, but wouldn't it be rather foolish to abolish public schools and libraries, placing the social life and development of the country in jeopardy, and ruining the opportunities of some poor striving individual because of an inferior element?"

Arthur V. Hughes, '37, VI-A, 81 Joy St., Boston:

"The implication is that there is a waste of time and funds on said uneducable people. Undoubtedly the good arising from such institutions sweeps aside any objections on the grounds of waste and futility."

Dominic J. Cestoni, '37, X, 10 Rocky Nook Ter., Boston:

"How are we to find out whether a person is educable or not? We must have a means supplied by the public in order to find this out since about 50% of our educable people are unable to attend private institutions."

Leo J. Goldslag, '35, I, Dormitories:

"I consider Professor Roberts absolutely wrong. Free public schools and libraries are worthwhile even if used to advantage by only a few. The advantages acquired by these few react to the benefit of all."

Robert Y. Jordan, '37, VI-C, Dormitories:

"I am opposed to this idea, because I believe that, regardless of the abuse existing in the systems as they stand today, a great deal of benefit results from them. Probably the solution lies in improving the personnel and management."

Robert L. Kennigott, G, VIII, Newtonville:

"Prof. Roberts' statement has all the earmarks of academic superiority. How can he substantiate the presumption that the masses are not 'educable' when our present society has never really offered them an education? Look to the U. S. S. R., Professor Roberts!"

THE LOUNGER

Breakfast in Bed

We must compliment the dorm residents of Walcott and Bemis on their exceptional self control. A tray with breakfast china belonging to the Walker Dining Service has been standing at the head of the stairs for a whole day, and no one has yet tried out its coefficient of restitution. But what we'd like to know is—who indulged in the old American custom of Breakfast-in-Bed, and then deserted the remains out at the stairway. The matter will bear investigation.

Student Conference Will Investigate Government Jobs

Meeting At Harvard To Discuss Chances For Student In Public Service

To study the advantages and disadvantages of entering public service, the Student Conference on Careers in Government has been planned to take place this spring at Harvard University. The project was undertaken by a group of students to meet the pressing needs for impartial and pressing investigation of the opportunities and security of jobs in government service, federal, state, and municipal.

Devise New Procedures

College presidents throughout the country have harped on the new problem of training American students for public service. President Conant of Harvard in a speech before the New York Economic Club declared: "We are bringing all the resources of the University to bear on this problem, with the expectation that we can devise a number of new procedures by which we may prepare for government positions men capable of undertaking the large tasks which circumstances seem to be forcing upon governmental agencies."

Noted Men to Speak

A dozen speakers all intimately and personally acquainted with government as it is will lecture at public meetings and conduct informal question-and-answer round-tables at the conference. Some of the speakers thus

far engaged are: Dr. Tyler Dennett, president of Williams College, who will speak on the "Dangers of Bureaucracy", Leonard White, United States Civil Service Commissioner: to speak on "The Federal Civil Service", Dr. Arthur Macmahan, professor of Government at Columbia University: "A Critical Study of New Deal Officials", and the Republican candidate for Mayor of Worcester in 1933, who will speak on "Municipal Policies as an Avocation."

Prominent Woman to Speak

Some woman actively engaged in public service at Washington will speak on "The Woman's Stand In Politics". The conference includes a speaking program Friday evening, April 12, and Saturday afternoon, April 13, and round table discussion Saturday morning.

Dramashop

(Continued from Page 1)

Mayo, Ethelyn S. Trimbley, '36, Irwin Wagner, '36, Frederick R. Claffee, '37, Mary M. Goldwater, '35, who is cast in the leading role as Ruth, Robert's wife, Frances C. Blackwood, '37, Donaldson R. McMullin, '36, and Rufus P. Isaacs, '36.

At the last meeting of Dramashop it was decided that tryouts for prospective members will be held probably some time next month. There will be a business meeting of the club next Tuesday. Tea has been planned for next month.

Tickets for "Beyond the Horizon" may be purchased from members of Dramashop, or may be obtained in Room 2-176, or at the door. They are priced at one dollar.

SPORTS COMMENT

The Technology gymnasias will be busy places this week-end, with boxing, gym, wrestling, basketball, and fencing all on tap for sports followers. The gym team offers another fine attraction, with the Annapolis Middies bringing a squad of nineteen gymnasts to Walker gym tomorrow afternoon. Evidently the little disagreement over the payment of a guarantee which threatened to force cancellation of the meet has been cleared up to the satisfaction of all concerned.

* * * * *

Your bursar's card will admit you to the boxing, fencing, and gym meets, but we warn you that your status as a student at Technology won't get you through the gates at the wrestling tournament nor at the interscholastic basketball tourney. These tournaments, however, are well worth the price of admission. In the finals of the wrestling tomorrow evening, the best of the New England college grapplers will display their wares in the championship competition. If you want to see some high class basketball games, drop around to the Hangar tonight or tomorrow night and watch the best high school fives in Eastern Massachusetts in action.

* * * * *

Let's hope the rifle team returns to the victory path tomorrow against Yale. Of late the Engineer marksmen have been below their early season form, and unless they perk up against the Elis in tomorrow's match, another setback will be the result.

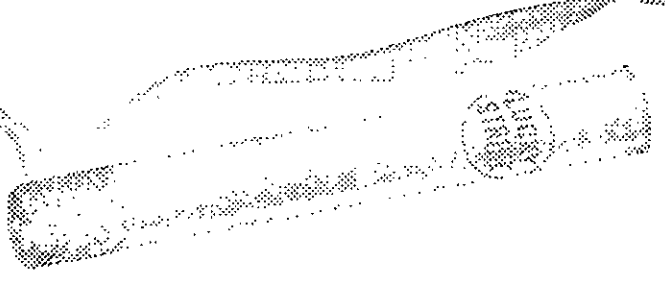

* * * * *

Tommy Rawson has had to send his boxers outdoors these last few days in training for tomorrow's meet with Springfield. The erection of the temporary stands in the Hangar necessitated the covering over of the ring, with the result that the leather-punchers had to be-take themselves to the board track to keep in condition.

* * * * *

Henry McCarthy certainly is a busy man these days, with the conduct of the interscholastic hoop tourney resting upon his shoulders. There are a thousand and one little details to be attended to and then there are the inevitable seekers of free passes to be kindly but firmly informed that there are no more Annie Oakleys being distributed. It's no wonder that Mac welcomes any chance to get a little peace and quiet. His only such opportunity yesterday as well as we could observe was during the second afternoon game when we noticed him unobtrusively take a seat alone in the far corner of one of the stands.

TAKE ME ALONG. I'm your best friend
I am your Lucky Strike

Choose me for your companion. I don't tolerate the bitterness, the acrid sting of undeveloped top leaves. Why should you? I don't tolerate the harshness of gritty, tough, bottom leaves. Neither should you. I give you exclusively the fragrant, expensive center leaves—the mildest, the best-tasting of all. They permit me to sign myself "Your Best Friend."

Six Teams Meet Today for N.E.I.C. Wrestling Crown

(Continued from Page 1)

light-heavy and heavyweight classes last year will be replaced by two newcomers Rosengren and Coons. Technology will be more fortunate than Springfield in that with two exceptions, Ricks will be able to start the same men who saw either the freshman or varsity action in last year's competition. Co-Captain Avedis Marderosian who was runner-up last year in the 126 lb. class will probably win his event, especially since Slate of Tufts who has had that title for the past two years has moved up to the 135 lb. class. Slate is a scientific wrestler in a class by himself, and Co-Captain Oshry who will represent the Beavers in the 135 lb. event will find plenty of competition from him if they should meet.

In the 118 lb. class, Harold George, who two years ago was Freshman Intercollegiate winner, and runner up to Gillespie of Tufts last year, has not been able to make weight, and Ed Clark will take over George's responsibilities.

In the 145 lb. class, Ed Boyan, will carry the Technology colors. Last year Ed was runner-up in his event, losing to Leathers of Springfield who had also won the title in 1933. In the 155 lb. class Ricks is entering Joe Heal who last year won the Freshman Intercollegiate title in the 165 lb. class.

(Continued on Page 5)

Springfield To Meet Boxers In Hangar at 2 P.M.

Time Changed To Afternoon On Account Of Tech Tourney

Team Hopes To Get First Win

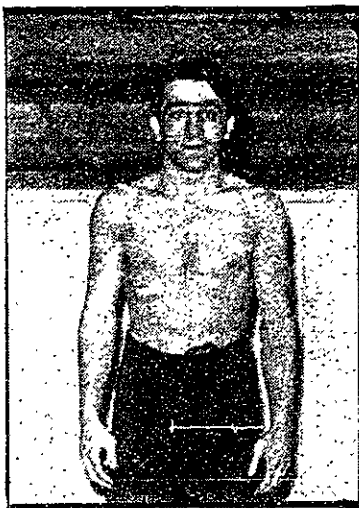

Tommy Rawson and company will bring to a close this year's boxing season when they meet Springfield College here in the Hangar Gym tomorrow afternoon at two o'clock. This is the last meet before the intercollegiate at Penn State the following week-end, and as it stands now the team should conclude the season with a win, since Springfield is forfeiting two bouts, the 115 lb. event and the 125 lb. event. This is an unusual event in the history of the M. I. T. boxing team, since usually it is the one to be in the unfortunate position that Springfield is now experiencing. However, the victory to the Beaver leather pushers will by no means be served to them on a platter, as Springfield has an aggressive team that can boast well matched bouts with Columbus, Harvard, and Coast Guard, all of whom have previously met and defeated Tech.

One other advantage that Tech can boast over the Springfield team is that this Saturday's lineup will find all of Tech's regulars entered in their respective weights. Captain Nick Lefthes will be featured in the 145 lb. meet, and this being Nick's first home appearance for the season, it is expected that a large turnout will be on hand to see him in action. Nick has been followed by an injuries jinx the past season, and due to a split knuckle and banged elbow, he has participated in only two meets.

Jimmy Casale, 165 pounder, and the highest point winner on the team will also be in action and Tommy Rawson expects him to add another point to his total. In the heavyweight class, Mike Kuryla will wear the Tech colors. Mike has been working hard the past few weeks and when he meets the Springfield heavyweight K. O. artist, certain Mr. Mountain, there will be plenty of fur flying in the ring.

On account of the Tech Basketball Tourney in the Hangar Gym, the regular boxing ring will not be available. However Bert Smith, the Superintendent of Buildings, who is also a fight fan, has arranged for a temporary ring.

Tech Co-Captain

Co-Captain Avedis Marderosian who is expected to win the 126 lb. event in the N. E. I. W. Tourney.

Inter-class Meet in Track Saturday

Johnson and Thomson Expected To Lower Records After Winter Training

Saturday afternoon at 2 P. M. Oscar Hedlund's tracksters will compete on the boards in the first Indoor Inter-class Meet of the season.

The mild weather has pepped up the boys considerably and several meet records are expected to fall. With the spring season just around the corner, track is coming to the front, and Saturday's meet will undoubtedly be a success.

Records May Be Broken

The field event records are the ones that will take a beating. In the broad-jump, Stan Johnson who won in the University Club Meet and placed third at the I. C.-4A's in New York recently, should have little trouble in lowering his record of 21 ft. 10 1/4 in. Stan has recently jumped over 23 ft. in two successive meets and in each he has broken a record. At the Club Meet he set a new Class "A" and Harvard Cage record and at New York he created a new Institute mark. There is little doubt but that he will set a new Indoor Interclass mark this Saturday, and if it were not for the short runway in the hangar we would guarantee it.

In the high-jump, Jim Thomson has a chance to lower the present mark of 5 ft. 11 in. Jim has turned in some exceptionally fine performances this winter. In New York his six foot two leap after he had split a thigh muscle, and this same injury may hamper his jumping on Saturday.

Still another field record that may fall is the 12 ft. 1/2 in. pole vault. Both Stark and Donnan are able to clear

Lacrosse Schedule

Lacrosse practice this year will begin on Monday, March 12, at 5:00 o'clock outside the Barbour Field House. Coach Tommy Tucker will start active practice; all veterans are urged to come out for the sport although experience or previous training is by no means a necessity. As many freshmen as possible should report on Monday. If a sufficient number turns out, a Freshman team will be formed.

12 feet. Stark vaulted 12 feet at the University games while Donnan has cleared 12 ft. 3 in. at practice in the hangar. The competition in this event will be one of the highlights of the afternoon.

The only running event record that seems endangered is the mark of 1m. 15 1-5 s. for the 600. Cooper is in fine form for the meet and with Jarrell to push him he may lower the time for this event.

Gymnasts Meet Navy Saturday Afternoon

Close Fight Is Expected; Navy Was One Of Strongest Teams In East

In the fourth meet of the current season, the gym team will meet the Navy gymnasts on Saturday March 9. The meet will take place in Walker Memorial gymnasium and will begin at about 1:30 P. M. Navy has one of the best teams in the East and the match is sure to be a close one, and the Middies are conceded as having one of the best chances to win the Intercollegiate several weeks from now. Tech first place winners last week are sure to have a tough struggle to top the crack Navy men. The Institute gym team has been hampered recently by minor injuries which while not serious enough to keep the men out of competition are yet troublesome and keep the men from being in top form.

Technology Will Compete in The N. E. Swim Meet

Eight Men Will Represent Tech In The Championship Meets In Conn.

Technology will send eight men to compete in the New England Intercollegiate Swimming Association meet which will be held on March 8 and 9 in Middletown, Connecticut. The meet is under the auspices of Wesleyan College which will supervise the matches which will take place in the Wesleyan Pool.

Believing that it is better to send down a smaller number of men who are more likely to win their events than to send down the whole team, Max Untersee, swimming coach, is sending the following eight men to the matches. The events in which the men are here listed to compete are tentative and will be decided upon during the competition as the coach sees fit.

The list of men is as follows: Jack Chapper, 50 yard free style, 100 yard free style, relay; Bernard Vonnegut, medley relay, 200 yard breast stroke, relay; Robert Granberg, Captain, individual medley, medley relay, 50 yard free style, 100 yard free style, relay; P. Heywood, dive, 100 yard free style, relay; Bill Hope, Medley Relay, 150 yard back stroke; Peter White, Medley Relay, 200 yard breast stroke; James Henew, Medley Relay, 220 yard free style, 440 yard free style, relay; Cleon Dodge, Medley Individual, medley relay, 220 yard free style, 50 yard free style, 440 yard free style, 150 yard back stroke, 100 yard free style, relay. Technology's hopes are centered in Cleon Dodge, Paul Heywood, and Vonnegut. Vonnegut and Heywood have both won five firsts and 3 seconds; Dodge has not been beaten in the back stroke events all season.

of campers are out for crew and track, while in squash and fencing, both of which received little notice, the reverse is true. The same trend is noticeable in other sports.

Even short descriptive talks in addition to actual demonstrations seem to help in bringing men out. THE TECH, Technique, and the T. C. A. all had higher percentages of campers than non-campers. Only Voo Doo of the non-athletic activities surveyed showed an opposite trend.

Following is the detailed tabulation of the percentages in each activity studied:

Activity	% of Freshmen who Were Not At Camp	% of Freshmen who Were at Camp
Track	9.2%	19.0%
Crew	10.0	14.0
Squash	12.0	10.0
Swimming	6.0	4.5
Rifle	4.8	5.5

Boxing	2.7	5.0
Gym	2.4	5.0
Basketball	2.4	3.5
Wrestling	2.4	3.5
Fencing	3.0	1.0
Tennis	.6	0.0
The Tech	2.7	7.0
Voo Doo	3.3	2.5
Technique	1.5	7.5
T. C. A.	2.7	3.0
Totals	65.7%	91.0%

Norfolk Ag. Students Tour Technology Area

Twenty young men from the Norfolk County Agricultural school made their visit to the Institute on the afternoon of Wednesday, March 6 and were shown through the different departments by William Jackson of the information office. Every year for the past eight seasons a group from Norfolk has included a similar tour of inspection in its program. The students were much interested in the electrical and aeronautical laboratories and apparatus, the wind tunnel especially coming in for its share of attention.

Prof. Glueck Talks On Criminal Justice

Criminology Expert At Harvard Gives Free Lectures

Sheldon Glueck, professor of criminology at Harvard, and practising member of the Bar of the State of New York, will give a series of eight free public lectures in the Lowell Institute on Criminal Justice.

The first of the series is "A Plaything of Justice" to be given on Monday, March 2, 1935, followed by: "The Stuff of Justice" Wednesday, March 13, "The Blindness of Justice", Monday, March 18, "The Lameness of Justice," Wednesday, March 20, "The Shackles of Justice", Monday, March 25, "The Scales of Justice", Wednesday, March 27, "The Future of Justice", Monday, April 1, "The Goodness of Justice and the Quality of Mercy," Wednesday, April 3.

All lectures are to be given in Huntington Hall, 491 Boylston Street, at 5 o'clock in the afternoon. Doors opened at 4:30 P. M. but closed at 5 and throughout each lecture.

Tickets may be secured, free of charge, by applying by mail to The Curator of The Lowell Institute, 491 Boylston Street, Boston, and enclosing one stamped, addressed envelope for each ticket.

Wrestling

(Continued from Page 4)

Joe is a powerful boy who can pit his strength against all comers in his class with good chance of winning. In the 175 lb. class, Ricks is not entering anybody as Pellam can not compete on account of studies, and because Tom Graham, the other 175 pounder is now out for crew. In the heavy-weight event, Don Cestoni will represent Tech and should have a fair chance of reaching the finals which is expected to be won by Love of Yale.

The strong freshman team will be entered in its entirety, and it is expected that at least two yearlings will bring home the bacon. Peyton and Strom, entered in the heavy and light-heavy class events are the two boys who are expected to keep up their consistent good work of the past season.

At the present time, the probable winner is problematical, although Tufts seems to have the edge. Last year, Tufts placed second to Springfield, losing by only one point. Since Springfield has only two veterans, back, it makes it almost certain that the gymnasts will lose their intercollegiate crown. As in previous years,

the winning college will be presented with a plaque. Individual winners will be presented with gold medals for first place, silver for second, and bronze for third.

Inquires

(Continued from Page 2)

Robert S. Gordon, '37, XV 2, Brighton: "I do not agree with Professor Roberts nor do I understand how he arrives at his conclusions. In my opinion any person over six years of age, unless he is proven mentally unsound, is educable, progressively, to at least the degree afforded by the free public high schools, and any person who has received this education has the ability to use the free public libraries."

Question for next issue: "With what attitude do you regard the fact that the Technology athletic teams are seldom victorious in their contests?"

WHEN YOU FACE A TOUGH ASSIGNMENT —

GET A LIFT WITH A CAMEL!

"SPEED SKATING
takes an abundant supply of stamina and energy. Camels restore my 'pep' when I've used up my energy. And they taste so good, too. For sheer pleasure, there's nothing like a Camel." (Signed) **JACK SHEA**, Olympic Champion Speed Skater

OUR TOBACCOS COST MILLIONS MORE
"Camels are made from finer, MORE EXPENSIVE TOBACCOS — Turkish and Domestic — than any other popular brand."
(Signed) **R. J. REYNOLDS TOBACCO COMPANY**
Winston-Salem, North Carolina

"THERE'S SO MUCH GOING ON in college today," says James Casey, '37, "that an undergraduate can hardly find time to work everything in. I'm studying a business course; am mixed up in several outside activities; and, in my spare time, I'm doing tutoring. So naturally I feel rather weary and 'fed up' at times. To head off fatigue, I always turn to Camels. Smoking a Camel does 'wake up' my energy. It's a delightful experience! And what a great taste Camels have—mild, yet full and rich. I never get tired of Camels. I guess that's why I smoke so many. But steady smoking doesn't bother me—Camels never get on my nerves!" (Signed) **JAMES J. CASEY, JR., '37**

"CHAMPIONSHIP GOLF puts a tremendous tax upon your energy. But I never mind. I know I can always restore my energy quickly with a Camel. For you get a delightful 'lift' with a Camel." (Signed) **HELEN HICKS** Former Women's National Golf Champion

CAMEL'S COSTLIER TOBACCOS NEVER GET ON YOUR NERVES!

Address By Sloane Inaugurates Series Of 5:15 Club Talks

First Of Weekly Discussions; Plans Made For Banquet, Moonlight Sail

Over 20 men gathered about a long table to hear an informal talk by Alvin Sloane of the Mechanical Engineering Department, Tuesday, March 5. This was the first noon weekly discussion meeting of the Commuters Club.

He began by saying that he and many of the instructing staff were commuters at heart, for the reason that they also travel daily between their homes and the Institute. He deplored the fact that school spirit was likely to be at a rather low ebb among the group who resided at home.

This was attributed to the cliquing of the dorm and fraternity men and of the lack of opportunity of commuters to participate extensively in athletics.

The inception of such discussions with the faculty would afford an opportunity for the 5:15 Club members to become acquainted with their instructors, he stated.

After he concluded, there were informal exchanges of ideas and wit among the group. The gathering was so successful that others will be scheduled every week.

The club will hold its special dance this coming Saturday night as one of its series of weekly Victrola parties. It is to be given in honor of the retiring officers, Gerald M. Golden, '35, president; William E. Keefe, '35, secretary; Frederick W. Travers, '35, treasurer; Kenneth D. Young, '35, and Hamilton H. Dow, '35, executive committee. Bridge prizes and others will be distributed.

Plans are now being made for the annual Father and Sons banquet, to be held sometime in April, and for a moonlight sail and dance.

Promotions Ordered For Three Officers

Basil A. Martin, Jr., '36, has been promoted to the rank of captain and will be in command of Company "A", according to special orders issued on March 5 by Captain Bayard Johnson of the Department of Military Science. Milton K. McLeod, '35, on the same date was promoted from second lieutenant to first lieutenant, and Delwin M. Campbell, '36 was appointed second lieutenant.

Debating

(Continued from Page 1)

at Technology, probably in Room 10-250, on April 25. The subject, as previously announced, will be the advisability of the extension of "dutch treats". The Engineers will become chivalrous and defend the status quo, while their fair opponents will argue for sharing the expenses.

Under the auspices of the Lions Club a debate will be held with Boston University on April 5, the subject of which has not yet been decided. Other tentative affairs are a freshman debate with Harvard, probably to take place on April 1, and another freshman contest with Boston University.

Sigma

(Continued from Page 1)

Sigma Xi Prizes and select from them not more than three which shall be submitted to the Sigma Xi Prize Committee not later than the last day of exercises of the second term together with a written statement of the merits of the thesis or theses selected.

Select Three Best

The Sigma Xi Prize Committee will be made up of the Chairman of the various department committees, each

of whom shall be prepared to defend the theses submitted by his department. This committee shall select a Chairman from among its members. The Sigma Xi Prize Committee shall select the three best of the theses submitted to it, shall mark them in order of preference, and shall vote the Sigma Xi Prizes to the authors of these theses in the order of preference. The Committee is also authorized to make any necessary interpretations not covered by the present outline.

Chemical Society To Hear Gaston du Bois

Frank J. Curtis To Tell Of Experiences In Panama

Gaston Du Bois of the Monsanto Chemical Company of St. Louis, Missouri, will speak tonight at the 283rd meeting of the Northeastern Section of the American Chemical Society at the American Academy of Arts and Sciences, 28 Newbury St., Boston. His subject will be "New developments in the Application of Organic Intermediates to the Industrial Arts."

Preceding the meeting, dinner will be served at the Engineer's Club, 2 Commonwealth Ave., at 6:00. At the dinner, Mr. Frank J. Curtis will describe his recent experiences in Panama and northern South America. An invitation is extended to all interested in "Caribbean Chemistry" and the use of organic intermediates.

M.I.T. Fencers Defeat Boston College 14-3

Following up their recent win over the YMCA, the varsity fencers gained an easy victory over their Boston College opponents in the Walker Gym last Wednesday night, with the final score of 14-3. Captain Hugh Fenlon is looking forward to another win this coming Saturday when his team meets the Norwich fencers at MIT.

The summary of the meet:

Foils--Toorks (T) defeated Rooney (B), 5-1; Ryan (B), 5-1; Ozol (T) defeated Lydon (B), 5-0; Ryan (B), 5-1; Fenlon (T) defeated Rooney (B), 5-2; Rooney (B) defeated Dauphine (T), 5-2; Bartlett (T) defeated Lydon (B), 5-2; Lydon (B) defeated Fenlon (T), 5-4; Van Tona (T) defeated Sullivan (B), 5-1.
Epee--Fenlon (T) defeated Rooney (B), 2-1; Feeney (B), 2-0; Rosenberg (T) defeated Lydon (B), 2-0; Feeney (B) defeated Bartlett (T), 2-0.
Sabre--Dauphine (T) defeated Carmody (B), 5-4; Lydon (B), 5-3; Suarez (T) defeated McNulty (B), 5-0; Carmody (B), 5-2.

Frosh Have Two Meets

Coach Roth's freshmen match their skill against Dorchester High School today, but their real test will come in their meet with the Providence High School's All Star Team Saturday. This same team last year defeated Tech 7-2.

Sports Medals

(Continued from Page 1)

For crew, basketball, soccer, lacrosse, and hockey, the medal will go to the most valuable player. In cross country, it will be given to the winner. For sports like gym, boxing, fencing and swimming, awards will be made for each event.

Four Squash Tournaments Slated To Start Soon

Entries To Close On March 13; Ceballos, Terry Entered

Four Squash tournaments will soon be in full swing at the M. I. T. courts. All sign-ups must be in by March 13.

The tournaments are as follows: the Emerson Cup, open to all men eligible for varsity squash; the Junior Varsity tournament; the freshman tournament; and the Individual Fraternity tournament which is open to all fraternity men not on the varsity squash team.

Ceballos and Terry who were entered in Intercollegiate and lost in the second round are entered in the Emerson Cup tourney and should be among the leading competitors.

Drama Club

(Continued from Page 1)

Street, Boston. Tickets, priced at one dollar per person, may be obtained at the information office, the T. C. A. office, or from Professor L. F. Hamilton.

"As Husbands Go", which was a hit both on the stage and screen, has as its theme the effect that European travel has on romance-starved, typically American women. The play opens when plans are being made at home to receive the lady of the house and her friend, who are returning from an extended tour of Europe. Imagine the surprise of the entire household, especially of the husband, when it is discovered that the ladies have brought home with them their male companions of the tour.
